

## why WebChart? flexibility, support and total cost of ownership

Whether your practice is purchasing its first EHR, or replacing a system that failed to deliver on your goals for productivity and efficiency, WebChart is the preferred choice for three simple reasons:

- 1. WebChart works the way you do.** The system adapts to your practice workflow, helping clinicians stay cognitive, not clerical.
- 2. Our support team's #1 priority is your success.** WebChart is backed by the skilled support of our US-based team, available 24/7 for person-to-person assistance.
- 3. WebChart is affordable — to buy and to use.** Completely web based, WebChart requires no additional hardware or software to buy and maintain. Data hosting, maintenance and upgrades are all included in a low monthly fee.

### minimally invasive® means high productivity

WebChart was designed to minimize disruption to your practice, giving your users tools built to adapt to their preferences.

- Works on any web-enabled device, on both PC and Mac platforms
- Integrates with existing systems for PM/billing, as well as with labs, pharmacies, registries, medical devices and personal health records
- Documentation options include dictation, notes or point and click
- Fully integrated document management supports scanning

#### *easy to learn, easy to use*

*"We were surprised at how quickly our providers got up to speed. Within a couple days, they could make it through a patient visit without any problems. Within a couple weeks, they were proficient with the system and seemed to have forgotten that it was something new. And certainly, after two months, it was like 'Geez, I can't believe we ever thought this was a challenge.'"*

*Keith Huff, MD  
Novapex*

In KLAS rankings for SaaS-based EHRs, WebChart tied for second place nationwide.<sup>1</sup>

## meaningful use, simplified

WebChart makes it easy to track and manage progress toward meaningful use, simplifying successful attestation. The onboard meaningful use dashboard provides at-a-glance status on the measures you select, helping you secure stimulus incentives while they're still available.

## backed by MIE: a leader in health IT innovation

The WebChart platform is a flagship solution of parent company Medical Informatics Engineering, Inc. The company, founded in 1995, has deep roots in interoperable data exchange and systems integration development. WebChart EHR was among the first systems certified for meaningful use, and spurred EHR implementation at a local rate ten times the national average — long before the advent of meaningful use reimbursement.

## accountable to providers and the patients they serve

MIE has an 18-year record of success delivering the products, value and services clients demand. From independent single-physician practices, to group practices, to multi-location specialty clinics and companies including Disney, Dow Chemical and Chevron, MIE is a trusted partner in healthcare information technology. Clients cite responsiveness and customer service as MIE hallmarks, assuring the support required for EHR success.
